### Overview

SLA-HV-6000 is an ideal single-channel high voltage amplifier for amplifying AC/DC signals. Maximum output 6kVp-p( $\pm 3\text{kVp}$ ) high voltage, can drive high voltage load. The voltage gain can be adjusted, and the common Settings can be saved with one key, providing a convenient and simple choice of operation. It can be used with the mainstream signal generator to achieve perfect signal amplification.

### Voltage Gain

Voltage gain 0~1000 times NC adjustable, specifically divided into coarse adjustment (1step) and fine adjustment (10 step) two. Combined with the LCD panel gain display, can quickly and accurately adjust to the required voltage value.

### LCD Panels Display

SLA-HV-6000 adopts liquid crystal display, dynamic display of device status and parameters, different color prompts make man-machine interaction more efficient, operation interface at a glance, simple and easy to understand.

### Monitor

1/1000 Monitor: The voltage of this port is 1/1000 of the output port, and the monitoring port is a BNC connector, which can be directly connected to the oscilloscope for real-time monitoring of the output voltage.

### Output & Input

The output is SHV RF connector, the maximum output voltage is 6kVp-p( $\pm 3\text{kVp}$ ), the maximum output current is 30mA<sub>p</sub>. The input is BNC interface.
